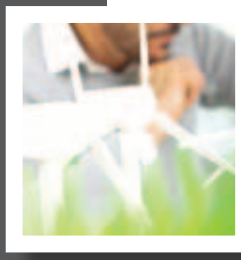
THE EUREKA Clean-Tech Action

CLEANTECH ACTION



Promoting EUREKA projects and support activities in the Clean-Tech Sector

ACCELERATING INNOVATIVE CLEAN-TECH SOLUTIONS TO THE GLOBAL MARKET

The EUREKA Clean-Tech Action (ECTA) – initiated for the first time in Europe - is aimed at encouraging the generation of cooperative industrial R&D projects in the clean-tech sector, utilizing all of EUREKA's support instruments.

As the largest platform for industrial R&D in Europe, encompassing 40 national R&D funding schemes, the EUREKA Network offers extensive funding opportunities, partner-matching services and events to industrial partners.

With EUREKA, you share your risks with your project partners and with the governments that give you support. From renewable energy to water technologies and much more, with EUREKA's assistance your clean-tech products and services will get to the market faster.

Opportunities for Funding and Access to Partners

Industrial participants are invited to team up, generate project proposals and apply for funding and support through all of EUREKA's instruments:

- **INDIVIDUAL PROJECTS**
  Close to Market projects, open to any participant: SME, large company and research Institutes in all industrial fields | Open year-round | ECTA applications due by May 2011
- **EUROSTARS**
  European funding and support program for close-to-market projects led by R&D performing SMEs | Next deadline for submission is March 24, 2011
- **EUREKA CLUSTERS**
  Larger scale cooperative projects with participants representing all the main industry stakeholders. EUREKA clusters are led by Europe's leading industries in ICT, water and energy technologies, including GE, Mekorot, VEOLIA, Suez Environment, Siemens, Philips, RAD, Schlumberger, EADS, Ericsson, Nokia, Alcatel-Lucent, France Telecom, Deutsche Telekom and more. | Deadlines based on each individual cluster. Check website for more details.

ACCESS TO FUNDING AND PARTNERS

Over the last 25 years EUREKA has mobilized 30 billion Euros of public and private funds to support R&D-performing businesses and institutions through cooperative projects.

Your project could be next.

EUREKA ISRAEL CHAIRMANSHIP 2010/2011

Events

EUREKA representatives and industrial partners are invited to participate in a series of clean-tech related events, supported by EUREKA and the Israeli EUREKA Chairmanship (2010-2011).

Learn more about funding opportunities and potential industrial partners in the field of clean-tech.

4TH ANNUAL EILAT - EILOT RENEWABLE ENERGY CONFERENCE & CONVENTION

in cooperation with the Israeli EUREKA Chairmanship

February 22-24, 2011 | Eilat, Israel

One of the leading platforms for technological innovation, business, policy and funding opportunities in the clean-tech and renewable energy fields, this 3-day conference is being held in partnership with the Israeli EURKEA Chairmanship. Participants will have access to lectures, technical visits, B2B partnering and project generation meetings.
In addition to regular conference events, those guests participating in the EUREKA Clean-Tech Action will receive special "E! Company" Status, which includes:

- 10% discount on registration fee
- 10% discount on exhibition booth sponsorship
- On-the-spot access to meetings with national funding bodies, including EUREKA National Representatives, to discuss funding opportunities
- Assistance in coordinating B2B meetings with other companies, end users, and investors attending the Conference

CLUSTER INFO DAY ON CLEAN-TECH

February 23, 2011 | 14:00- 18:00 | Eilat, Israel

Learn about support and funding opportunities for clean-tech projects through the various EUREKA Cluster calls for projects – featuring cluster participants from leading international companies.

EUREKA INVESTMENT SHOP

June 1st, 2011 | Israel

Companies involved in EUREKA-labeled projects are invited to meet Israeli, European and international private investors (VCs, Business Angels, Private Equity Funds, Investment Banks, etc), during this dedicated event. Companies will have the chance to discuss funding opportunities for the go-to-market phase for clean-tech related projects and more.
